Date: 3/11/2019

Subject: *CES (Cost Estimation System)* shutoff from production

Bureau(s) Affected: Maintenance and Operations, In-House Design, Mobility & Systems Engineering, Design Consultants, and Construction Management

Description of Issue(s): An upgrade to the system used to create estimates for NJDOT construction projects was put into production to replace *CES (Cost Estimation System)* in November 2017. To accommodate estimates for new and existing projects, both systems have been running concurrently until those developed in CES are finished their estimation phase. As of April 5, 2019, all estimates developed in CES will be complete.

Corrective Action Plan: The *AASHTOWare Project Estimation* suite has replaced CES as the NJDOT estimation software. CES will be taken offline on April 5, 2019. See BDC17T-03, dated October 23, 2017, for the *AASHTOWare Project Estimation: Users Guide for Estimation*.

Implementation: April 5th 2019
